- LEFT MUFFER ASSEMBLY 17-18	tems Supplied >	Application >	www.cobrausa
Read all instructions carefully and completely before installing your new slip-on mufflers. Remove and save the mounting hardware securing the mufflers to the brackets. Loosen the stock muffler clamps then pull the stock nufflers free from the headpipes. Save the stock clamps because they will be reused. Slide the stock clamps over the slip-on mufflers and position them as shown in Figure 1 with the hex head facing inward and towards the ground. Slide the mufflers onto the headpipes until the mounting holes align. Note: Indent on right muffler will face inward, Fasten the mufflers and position them as shown in Figure 1 with the hex head facing inward and towards the ground. From the rear, rotate the mufflers as needed so they are level with the ground and parallel with each other. Verify that the gap, where the mufflers meet the stock heatshields, is similar to the gap the stock muffler allotted. Check all clearances and alignments then tighten the mounting bolts to factory specifications. Tighten the muffler clamps should be flush with the end of the muffler when lightened. See Figure 2. If the muffler clamps are slid forward past the slots. The slots need to be covered by the clamp band so that it seals the slots properly. Rotate the clamp if necessary. Reinstall saddlebags carefully. IMPORTANT: Before starting your engine remove all fingerprints from chrome with a quality wax or chrome polish. Failure to do so can cause chrome discoloration. Clean the black exhaust tips with a mild dishwashing soal and a slot cloth. Avid abraisve cleaning methods such as granular or dry cleanser, singht, with a clean dishwashing soal and a soft cloth. Avid abraisve cleaning methods such as granular or dry cleanser, singht dishwashing soal and a soft cloth. Avid abraisve cleaning methods such as granular or dry cleanser, singht dishwashing soal and a soft cloth. Avid abraisve cleaning methods such as granular or dry cleanser, singht dishwashing soal and a soft cloth.	– RIGHT MUFFLER ASSEMBLY – LEFT MUFFER ASSEMBLY		17-18
Remove the saddlebags carefully. Remove and save the mounting hardware securing the mufflers to the brackets. Loosen the stock muffler clamps then pull the stock mufflers from the headpipes. Save the stock clamps because they will be reused. Slide the stock clamps over the slip-on mufflers and position them as shown in Figure 1 with the hex head facing inward and towards the ground. Slide the mufflers onto the headpipes until the mounting holes align. Note: Indent on right muffler will face inward. From the rear, rotate the mufflers as needed so they are level with the ground and parallel with each other. Verify that the gap, where the mufflers meet the stock heatshields, is similar to the gap the stock mufflers allotted. Check all clearances and alignments then tighten the mounting bolts to factory specifications. Tighten the muffler clamps. (NOTE: The muffler clamps should be flush with the end of the muffler when tightened. See Figure 2. If the muffler clamps are slid forward past the slots on the slip collar the clamps will not tighten the muffler specify Also, make sure the clamp spacer is not over the slots. The slots need to be covered by the clamp band so that it seals the slots properly. Rotate the clamp if necessary.) Reinstall saddlebags carefully. MPORTANT: Before starting your engine remove all fingerprints from chrome with a quality wax or chrome polish. Failure to do so can cause chrome discoloration. Due to fluctuations in fuel delivery settings, timing, etc., Cobra and a soft cloth. Avoid abrasive cleaning methods such as granular or dry cleansers, simple green, scotch-brite or steel wool pads. Abrasives may breach the coating and shorten life. FIGURE 1 FIGURE 2 FIGURE 1 FIGURE 2 FIGURE 2 FIGURE 1 FIGURE 2 FIGURE 2 FIGURE 2 FIGURE 2 FIGURE 4 FIGURE 2 FIGURE 4 FIGURE 4	nstruction Manual >	6267	Page 1 of 1
Remove the saddlebags carefully. Remove and save the mounting hardware securing the mufflers to the brackets. Loosen the stock muffler clamps then pull the stock mufflers from the headpipes. Save the stock clamps because they will be reused. Slide the stock clamps over the slip-on mufflers and position them as shown in Figure 1 with the hex head facing inward and towards the ground. Slide the mufflers onto the headpipes until the mounting holes align. Note: Indent on right muffler will face inward. From the rear, rotate the mufflers as needed so they are level with the ground and parallel with each other. Verify that the gap, where the mufflers meet the stock heatshields, is similar to the gap the stock mufflers allotted. Check all clearances and alignments then tighten the mounting bolts to factory specifications. Tighten the muffler clamps. (NOTE: The muffler clamps should be flush with the end of the muffler when tightened. See Figure 2. If the muffler clamps are slid forward past the slots on the slip collar the clamps will not tighten the muffler specify Also, make sure the clamp spacer is not over the slots. The slots need to be covered by the clamp band so that it seals the slots properly. Rotate the clamp if necessary.) Reinstall saddlebags carefully. MPORTANT: Before starting your engine remove all fingerprints from chrome with a quality wax or chrome polish. Failure to do so can cause chrome discoloration. Due to fluctuations in fuel delivery settings, timing, etc., Cobra and a soft cloth. Avoid abrasive cleaning methods such as granular or dry cleansers, simple green, scotch-brite or steel wool pads. Abrasives may breach the coating and shorten life. FIGURE 1 FIGURE 2 FIGURE 1 FIGURE 2 FIGURE 2 FIGURE 1 FIGURE 2 FIGURE 2 FIGURE 2 FIGURE 2 FIGURE 4 FIGURE 2 FIGURE 4 FIGURE 4	Read all instructions carefully and cor	npletely before installing you	r new slip-on mufflers
 Remove and save the mounting hardware securing the mufflers to the brackets. Loosen the stock muffler clamps then pull the stock mufflers fore from the headpipes. Save the stock clamps because they will be reused. Slide the stock clamps over the slip-on mufflers and position them as shown in Figure 1 with the hex head facing inward and towards the ground. Slide the mufflers onto the headpipes until the mounting holes align. Note: Indent on right muffler will face inward. Fasten the mufflers using the stock mounting hardware in the same manner as stock but do not tighten. From the rear, rotate the mufflers as needed so they are level with the ground and parallel with each other. Verify that the gap, where the mufflers meet the stock heatshields, is similar to the gap the stock mufflers allotted. Check all clearances and alignments then tighten the mounting bolts to factory specifications. Tighten the muffler clamps in the slots on the slip collar the clamps will not tighten the muffler spoephy Also, make sure the clamp spacer is not over the slots. The slots need to be covered by the clamp band so that it seals the slots properly. Rotate the clamp if necessary.) Reinstall saddlebags carefully. MORDTANT: Before starting your engine remove all fingerprints from chrome with a quality wax or chrome polish. Failure to do so can cause chrome discoloration. Due to fluctuations in fuel delivery settings, timing, etc., Cobra Engineering does not warrant against chrome discoloration. Clean the black exhaust tips with a mild dishwashing soal and a soft cloth. Avoid abrasive cleaning methods such as granular or dry cleansers, simple green, socch-brite or setter work shown in the stock with with PS ShOULD BE. FIGURE 1 FIGURE 1 CLAMP SHOULD BE CLAMP SHOULD BE FIGURE 2 D NOT SLIDE CLAMPS FOR NOT PROVE BAFFLE FROM MUFFLER BORY. CLAMP SHOULD BE FIGURE 2 D NOT RUPFLER WILL VOID WARRANT		,	
 then pull the stock mufflers free from the headpipes. Save the stock clamps because they will be reused. Slide the stock clamps over the slip-on mufflers and position them as shown in Figure 1 with the hex head facing inward and towards the ground. Slide the mufflers onto the headpipes until the mounting holes align. Note: Indent on right muffler will face inward. Fasten the mufflers using the stock mounting hardware in the same manner as stock but do not tighten. From the rear, rotate the mufflers as needed so they are level with the ground and parallel with each other. Verify that the gap, where the mufflers meet the stock heatshields, is similar to the gap the stock mufflers allotted. Check all clearances and alignments then tighten the mounting bolts to factory specifications. Tighten the muffler clamps. (NOTE: The muffler clamps should be flush with the end of the muffler when tighten the mufflers properly. Also, make sure the clamp pacer is not over the slots. The slots need to be covered by the clamp band so that it seals the slots properly. Rotate the clamp if necessary.) MPORTANT: Before starting your engine remove all fingerprints from chrome with a quality wax or chrome polish. Failure to do so can cause chrome discoloration. Due to fluctuations in fuel delivery settings, timing, etc., Cobra and a soft cloth. Avoid abrasive cleaning methods such as granular or dry cleansers, simple green, scotch-brite or steel word pads. Abrasives may breach the coating and shorten life.
