- STEP 1** Read and understand all steps in the instructions before starting the installation. Park the motorcycle on a hard, level surface and turn off the ignition. Let motorcycle cool.
- STEP 2** Refer to PIC 2. Place masking tape on the top (painted) surface of the Tour-Pak in the location of the luggage rack legs to prevent scratching.
- STEP 3** Set the luggage rack in position on top of the tour box, with the legs resting on the masking taped areas. While holding the rack centered where you want it, trace the location of the legs on to the masking tape. Carefully mark the very center of your tracings.
- STEP 4** Double check to be certain the rack is centered in the position you desire. Carefully drill a 1/4" hole at the center of the marked locations. (Hint: You may want to drill a smaller diameter pilot hole first. This will lessen the chance of the drill "walking" and harming the finish. While drilling the rear holes, try to match the angle of the rear mounting legs.)
- STEP 5** Refer to PIC 3 and 4. Mount the front half of the luggage rack first. Remove the masking tape from around the two front holes. From the underside of the lid, insert a 1/4-20 x 1 screw with a flat washer and a rubber washer (rubber washer against the underside of the lid). On the top side, place a rubber washer, then a concave foot washer over the protruding screw and thread the screw in the luggage rack. Do this for both the front mounts. Keep these screws loose to allow easier mounting of the rear portion of the luggage rack.
