STEP 1 Read and understand all steps in the instructions before starting the installation. Park the motorcycle on a hard, level surface and turn **IGN OFF**.

STEP 2 Refer to **PIC 1**. Use a small screwdriver or pick tool to remove the OEM spiral spring-retainer from the pin. **BE PATIENT!** Lift the leading edge of the retainer out of the groove in the pin. Slide the retainer off the pin; it will "unwind" as it is removed. Discard the retainers, they will not be reused.

STEP 3 Remove the pins from the mounts; remove the existing pegs; save the pins.

STEP 4 Refer to **PIC 2**. Loosely install the footrest (available at kuryakyn.com) on the Adapter; the Adapters are NOT side specific.

STEP 5 Slide the footrest assembly into the mount; align the holes and secure with the existing pin. If the assembly has a loose fit, install the included "D" washer in between the mount and Adapter.

STEP 6 Secure the pin with the included Snap Ring; ensure that the Ring fully seats in the groove; it should spin freely when installed correctly.

STEP 7 Repeat **STEPS 4 through 6** for the other side.

STEP 8 Follow the instructions included with the footrests to complete the installation.
